Foreman - Bug #14038

Selecting multiple cores per socket not working against vmware provider (image cloning)

03/03/2016 07:54 AM - Ivan Necas

Status: Closed

Priority: Normal

Assignee: Ivan Necas

Category: Compute resources - VMware

Target version: 1.11.1

Difficulty: Fixed in Releases:
Triaged: Found in Releases:

Bugzilla link: 1314352 Red Hat JIRA:

Pull request: https://github.com/theforeman/foreman/p

ull/3274

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1314352

Description of problem:

Selecting multiple cores per socket not working against vmware provider (image cloning)

Version-Release number of selected component (if applicable):

sat6.1.7

How reproducible:

always

Steps to Reproduce:

- 1. Defaine new VNware ESX host from the image.
- 2. Assign different to default=1 value to Cores per Socket.
- 3. Create a host

Actual results:

Deployed machine shows "Cores per socket" = 1

Expected results:

Deployed machine shows "Cores per socket" given value as well as machine resizes on several sockets in Vmware cluster
