Foreman - Bug #14041

VM provisioning : dropdown lists greyed out in new volume fields

03/03/2016 09:16 AM - Alexandre Barth

Status:	Closed		
Priority:	Normal		
Assignee:	Dominic Cleal		
Category:	Host creation		
Target version:	1.10.3		
Difficulty:		**Fixed in Releases:**	
Triaged:		**Found in Releases:**	1.11.0
Bugzilla link:	1319275	**Red Hat JIRA:**	
Pull request:	https://github.com/theforeman/foreman/pull/3323		

Description

When provisioning a new VMWare vm, in storage section when i want to add a second volume after the default one, Datastore Cluster and Data Store drop-down lists can't be modified.

Associated revisions

Revision 26eeda80 - 03/22/2016 06:45 AM - Dominic Cleal

fixes #14041 - don't call select2 on CR form templates

select2 must be called only when the select becomes visible, not for hidden template elements. add_child_node() already does when adding a new set of fields from the template. without_select2 is removed from all CR volume fields and a typo from ce59b508 fixed to ensure the first, default volume initialises select2 when a CR is selected.

The interface_type_selected function is fixed to only call select2 on its elements instead of the entire page, which also broke the volume form templates if a NIC type was changed.

History

#1 - 03/03/2016 09:23 AM - Dominic Cleal

- Subject changed from VM provisioning : can't add volumes to VM provisioning : dropdown lists greyed out in new volume fields

- Category set to Host creation

- translation missing: en.field_release set to 71

#2 - 03/05/2016 06:55 AM - Timo Goebel

I also saw this on vanilla 1.10 without the datastore cluster patch. I think, this is related to select2. If you disable select2 in the developer console on
all select boxes everything works fine. Maybe someone with more UI/jQuery experience than me can take a look.
