<b>Category:</b> Compute resources - GCE	
<b>Target version:</b> 1.11.0	
<b>Difficulty:</b>	<b>Fixed in Releases:</b>
<b>Triaged:</b>	<b>Found in Releases:</b> 1.11.0
<b>Bugzilla link:</b>	<b>Red Hat JIRA:</b>
<b>Pull request:</b> <a href="https://github.com/foreman/foreman/pull/3320">https://github.com/foreman/foreman/pull/3320</a>	
<b>Description</b>	
<p>I have just freshly installed Foreman using foreman-installer with few --enable arguments.</p> <p>I Can't create new compute resource with GCE provider. When click on "Load zones" I receive test connection succeeded, zones get loaded and the email column gets blank(unpopulates). However when I click "Submit" Nothing happens. The page just refreshes and stays at same page. Again email column get blank.Checkin /var/log/foreman/production.log shows following relevant lines:</p> <pre>2016-03-13 11:41:58 [app] [I] Started PUT "/compute_resources/test_connection" for 86.14.xxx.xx at 2016-03-13 11:41:58 +0000 2016-03-13 11:41:58 [app] [I] Processing by ComputeResourcesController#test_connection as */* 2016-03-13 11:41:58 [app] [I] Parameters: {"utf8"=&gt;"", "authenticity_token"=&gt;"/CavAaychnAn/SUOSiDXZZLnis0B9gfgz+48QAYxIMc=", "compute_resource"=&gt;{"name"=&gt;"hslegalprovision", "provider"=&gt;"GCE", "description"=&gt;"HS legal provision project on google cloud.", "project"=&gt;"hs-legal-provision", "email"=&gt;"5858xxxxxxx-compute@developer.gserviceaccount.com", "key_path"=&gt;"/usr/share/foreman/HS-Legal-Provision-12f24752b7a2.p12"}, "cr_id"=&gt;"null"} 2016-03-13 11:41:58 [app] [I] CR_ID IS null 2016-03-13 11:41:59 [app] [I] Rendered compute_resources/form/_gce.html.erb (199.5ms) 2016-03-13 11:41:59 [app] [I] Rendered compute_resources/_form.html.erb (203.9ms) 2016-03-13 11:41:59 [app] [I] Completed 200 OK in 821ms (Views: 204.6ms   ActiveRecord: 1.2ms) 2016-03-13 11:42:18 [app] [I] Started POST "/compute_resources" for 86.14.186.10 at 2016-03-13 11:42:18 +0000 2016-03-13 11:42:18 [app] [I] Processing by ComputeResourcesController#create as HTML 2016-03-13 11:42:18 [app] [I] Parameters: {"utf8"=&gt;"", "authenticity_token"=&gt;"/CavAaychnAn/SUOSiDXZZLnis0B9gfgz+48QAYxIMc=", "compute_resource"=&gt;{"name"=&gt;"hslegalprovision", "provider"=&gt;"GCE", "description"=&gt;"HS legal provision project on google cloud.", "project"=&gt;"hs-legal-provision", "email"=&gt;"5858xxxxxxx-compute@developer.gserviceaccount.com", "key_path"=&gt;"/usr/share/foreman/HS-Legal-Provision-12f24752b7a2.p12", "zone"=&gt;"europe-west1-d"}, "commit"=&gt;"Submit"} 2016-03-13 11:42:18 [app] [I] Failed to save: URL can't be blank 2016-03-13 11:42:19 [app] [I] Rendered compute_resources/form/_gce.html.erb (685.0ms) 2016-03-13 11:42:19 [app] [I] Rendered compute_resources/_form.html.erb (688.4ms) 2016-03-13 11:42:19 [app] [I] Rendered compute_resources/new.html.erb within layouts/application (688.7ms) 2016-03-13 11:42:19 [app] [I] Rendered layouts/_application_content.html.erb (0.2ms) 2016-03-13 11:42:19 [app] [I] Rendered home/_user_dropdown.html.erb (1.1ms) 2016-03-13 11:42:19 [app] [I] Read fragment views/tabs_and_title_records-3 (0.1ms) 2016-03-13 11:42:19 [app] [I] Rendered home/_topbar.html.erb (1.9ms) 2016-03-13 11:42:19 [app] [I] Rendered layouts/base.html.erb (2.6ms) 2016-03-13 11:42:19 [app] [I] Completed 200 OK in 706ms (Views: 692.5ms   ActiveRecord: 1.1ms)</pre> <p>I am using Centos 7.2.1511 on google cloud compute itself. The install of foreman is intended to act as master for other hosts to be provisioned on gce. Ruby version- 2.0.0.598-25.el7_1</p> <p>Also I run the following in the startup-script metadata on this foreman install to set persistent hostname to my domain. hostnamectl set-hostname subdomain.mydomain.co.uk</p>
