Which version is this on? Can you make sure you're on the latest, as it looks OK here and I see the string is translated.

Is the other text on the window translated? Is the button translated if reboot/redémarrer maintenant is not ticked?

Please see the attached document.

It appears only when you have to reboot the virtual machine (for example when you try to rebuild a VM that was not already deployed)

Testing with latest nightly. Seems to be okay.

Maybe the translation is missing on your version (which version are you on?)

no reaction, closing. 100% translation coverage is not realistic anyway...
