Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1318629 ++ This bug was initially created as a clone of Bug #1318325 ++	
Description of problem: auth_source_ldaps have 'groups_base' attribute, value of which is not returned by any of POST/GET/PUT request in sat6.2.	
Version-Release number of selected component (if applicable): Satellite 6.2.0 Compose 3	
How reproducible: 100%	
Steps to Reproduce: 1. Issue HTTP POST request to https://sat.example.com/api/v2/auth_source_ldaps with 'groups_base' attribute set to some value (e.g. 'CN=foobargroup,DC=fortellolabs,DC=org'). 2. Capture the response. Examine the JSON payload and discover that the "groups_base" attribute is not mentioned. 3. Issue HTTP GET and HTTP PUT requests to previously created auth_source_ldap. Check the "groups_base" attribute presence.	
Actual results: 'groups_base' attribute is absent in GET/POST/PUT responses.	
Expected results: 'groups_base' attribute is present and has correct value.	
Additional info: Similar to #1318325
