Description	
There is another bug similar to issue #129 . On the hosts list the link to the report is correct, but when i click on it it takes me to http instead of https	
<pre><td class="last_report-column " > about 1 hour </td></pre>	
Must be in the javascript somewhere causing it.

Be compliant with the Puppet Forge

This fixes #143, as reported by @ryanycoleman

The ~> dependency expression used here is not expressly supported by the Puppet Forge and module tool. It may not always work as desired.

The currently supported expressions are documented here¹.

This bug is not a duplicate of [#142](#). I made the suggested patch but the behavior still exists. Perhaps i wasn't clear enough. It seems like it is the active scaffold javascript that is hijacking the link and redirecting to http instead of https.

if you go to the hosts page for the list of hosts (or the out of sync/error pages) the last report column has a proper url but when you click on it you get taken to [http:// instead](#).
