

## Foreman - Bug #14313

### expanding a fact does not maintain search making it impossible to find values

03/22/2016 07:38 AM - Thomas McKay

<b>Pull request:</b> <a href="https://github.com/foreman/foreman/pull/3516">https://github.com/foreman/foreman/pull/3516</a>	
<b>Description</b> For facts with hierarchy it is not possible to narrow down the values shown. For example, a system registering with subscription-manager has many groupings of facts (dmi, distribution, net, lscpu, etc.), each of which is shown with the "+" symbol to click on to drill down into that group. The problem is that when looking at a single host via search (eg. name = laptop.usersys.redhat.com), clicking the "+" brings you to a page with facts in that group for <i>all</i> hosts, not the one searched for. When there are more than a few hosts this generates pages of data. Entering the search again in attempt to reduce the values shown brings you back to the top level of facts.
