Packaging - Bug #14321

Package download from deb.theforeman.org freezes

03/22/2016 04:25 PM - Juan Carlos Perez

Status:	Resolved		
Priority:	Normal		
Assignee:			
Category:	Debian/Ubuntu		
Target version:			
Difficulty:		**Fixed in Releases:**	
Triaged:		**Found in Releases:**	1.10.0
Bugzilla link:		**Red Hat JIRA:**	
Pull request:			

Description

Environment
Ubuntu 12 precise
Updated
Running on VirtualBox
All updates and comunications are working fine

Trying to install with this command

sudo foreman-installer \
--no-enable-puppet \
--no-enable-foreman-plugin-bootdisk \
--no-enable-foreman-proxy \
--foreman-db-adapter=mysql2 \
--foreman-db-database=foreman \
--foreman-db-host=db.domain \
--foreman-db-manage=true \
--foreman-db-username=foreman \
--foreman-db-password='foreman_password' \
--foreman-db-port=3306 \
--foreman-db-type=mysql \
--foreman-server-ssl-ca=/etc/ssl/domain/certs/ca.pem \
--foreman-server-ssl-chain=/etc/ssl/domain/certs/ca.pem \
--foreman-server-ssl-cert=/etc/ssl/domain/certs/domain.pem \
--foreman-server-ssl-key=/etc/ssl/domain/private_keys/domain.pem

Keeps frozen in this step :

[DEBUG 2016-03-22 19:59:11 main] Executing '/usr/bin/dpkg-query -W --showformat '${Status} ${Package} ${Version}\n' for
eman-mysql2'
[DEBUG 2016-03-22 19:59:11 main] Executing '/usr/bin/apt-get -q -y -o DPkg::Options::=--force-confold install foreman-m
ysql2'
root@foreman:/var/log/foreman-installer# /usr/bin/apt-get -q -y -o DPkg::Options::=--force-confold install foreman-mysq
l2
E: Could not get lock /var/lib/dpkg/lock - open (11: Resource temporarily unavailable)
E: Unable to lock the administration directory (/var/lib/dpkg/), is another process using it?

After that I need to cancel and reboot the VM

I tried to check in the log and run manually the command

/usr/bin/apt-get -q -y -o DPkg::Options::=--force-confold install foreman-mysql2

And voila .. is trying to access to this
Get:1 http://deb.theforeman.org/ precise/1.10 foreman amd64 1.10.2-1 [47.5 MB]
Get:2 http://deb.theforeman.org/ precise/1.10 foreman amd64 1.10.2-1 [47.5 MB]
Get:3 http://deb.theforeman.org/ precise/1.10 foreman amd64 1.10.2-1 [47.5 MB]

Get:4 http://deb.theforeman.org/ precise/1.10 foreman amd64 1.10.2-1 [47.5 MB]
Get:5 http://deb.theforeman.org/ precise/1.10 foreman amd64 1.10.2-1 [47.5 MB]
Get:6 http://deb.theforeman.org/ precise/1.10 foreman amd64 1.10.2-1 [47.5 MB]

I was trying to find why that is not loading

http://deb.theforeman.org/dists/precise/1.10/binary-amd64/

I dont see the source .... not sure if that is correct ... but looks like is trying to get something for a place that doesnt exist....

Thanks
JC

History

#1 - 03/23/2016 04:07 AM - Dominic Cleal

- Project changed from Foreman to Installer

- Status changed from New to Feedback

- Difficulty deleted (easy)

If apt-get isn't working correctly then the problem isn't likely to be in the installer, I'd check that your network access is fast enough. Try using apt-get without the additional arguments that Puppet adds, see what download speed it receives.

The packages are at http://deb.theforeman.org/pool/precise/1.10/f/foreman/.

#2 - 03/23/2016 05:56 AM - Juan Carlos Perez

Hi there and thanks for your reply!

Obviously arrived to that point I have verified before to open this all the connection issues…. Here why ….
I tried this

/usr/bin/apt-get -q -y -o DPkg::Options::=--force-confold install foreman-mysql2

And this

apt-get -y install foreman-mysql2

So as you can see is not a connectivity issue :

root@foreman:/etc# apt-get -y install foreman-mysql2

In fact I was checking this

http://deb.theforeman.org/dists/precise/1.10/binary-amd64/Packages
to verify what we have there ... I sent a mail to Greg Sutcliffe as looks he is the main guy there!

So no ideas at this point ... but please don't close this one!

Thanks

#3 - 03/23/2016 06:07 AM - Dominic Cleal

- Project changed from Installer to Packaging

- Subject changed from Install Freezes in process to Package download from deb.theforeman.org freezes

- Category set to Debian/Ubuntu

- Status changed from Feedback to New

Do you have a proxy server between your host and the package repo? Perhaps that's interfering with the download, especially if it's a caching one. Our tests are running fine against the repos.

Greg's one of the developers, yes. A few of us maintain the packages and the server. I'm not aware of any other problems reported with downloads from it though.

#4 - 03/23/2016 06:38 AM - Juan Carlos Perez

Well I have good and bad news!
It took several hours to ran, I am checking the logs now…

JC

#5 - 03/23/2016 07:20 AM - Dominic Cleal

The installer is reporting two errors, can you run the commands it's trying to and pastebin the output/logs:

```
/usr/sbin/foreman-rake db:migrate
/etc/init.d/apache2 start
```

#6 - 03/23/2016 07:44 AM - Juan Carlos Perez

#10 - 03/23/2016 07:57 AM - Dominic Cleal

Could you try running (from /usr/share/foreman):

```
sudo -u foreman /usr/bin/foreman-ruby /usr/bin/bundle install --path ./vendor/ --local --no-prune
```

The show command may then work.

This all ought to happen during the postinst of the package, so I'm not quite sure what's gone wrong yet, as the apt-get command didn't show any errors either.

#12 - 03/23/2016 08:08 AM - Dominic Cleal

Did that fix the error with db:migrate? Did the show command work properly now?

#13 - 03/23/2016 08:12 AM - Juan Carlos Perez

And I don't know why it has installed mysql server ..

I am trying right now … let me explain you a little bit the scenario :
foreman.domain – 10.0.0.1
foreman-enc.domain – 10.0.0.2
foreman-reports.domain – 10.0.0.3
db.domain – 10.0.0.5
puppetmaster-1.domain – 10.0.0.6
puppet-ca.domain – 10.0.0.8

I am using a windows host, vagrant, virtualbox…….
For some reason the installer added mysql server to foreman.domain – 10.0.0.1
That is the host with that problem as well… and I had a problem in my vagrant file I was using

1. ln -s /vagrant/SSL/domain/certs/ca.pem /etc/ssl/domain/certs/ca.pem && \
   instead
   cp /vagrant/SSL/domain/certs/ca.pem /etc/ssl/domain/certs/ca.pem && \

So one sec and I will say something…

#16 - 03/23/2016 08:24 AM - Dominic Cleal

    And I don't know why it has installed mysql server ..

When --foreman-db-manage is true then it tries to manage the installation of the DB server too, you'd have to set this to false. However this has a
catch - the same setting controls both managing the DB server and also the automatic db:migrate and db:seed (initialising the database). This is OK
if the database is shared or already existed, but won't set up an empty one for you.

When db-manage is false, ignore the user/pass printed out - that's part of the db:seed step, which it won't be running.

    Syntax error on line 36 of /etc/apache2/sites-enabled/05-foreman-ssl.conf:
    SSLCARevocationFile: file '/var/lib/puppet/ssl/crl.pem' does not exist or is empty
    Action 'start' failed.
    The Apache error log may have more information.
    ...fail!
    root@foreman:/var/log/foreman-installer# more /var/lib/puppet/ssl/crl.pem
    Is asking for the crl on a diferent location ...?

Does that file exist? You may need to set the correct location with --foreman-server-ssl-crl if it's in another location (e.g. /etc/ssl).

#17 - 03/23/2016 08:27 AM - Juan Carlos Perez

This place is totally empty

```
root@foreman:/var/lib/puppet/ssl# pwd
/var/lib/puppet/ssl
root@foreman:/var/lib/puppet/ssl# ll
total 28
drwxrwx--x  7 puppet puppet 4096 Mar 22 18:18 ./
drwxr-x--- 14 puppet puppet 4096 Mar 22 18:19 ../
drwxr-xr-x  2 puppet puppet 4096 Mar 22 18:18 certificate_requests/
drwxr-xr-x  2 puppet puppet 4096 Mar 22 18:18 certs/
drwxr-x---  2 puppet puppet 4096 Mar 22 18:18 private/
drwxr-x---  2 puppet puppet 4096 Mar 22 18:18 private_keys/
drwxr-xr-x  2 puppet puppet 4096 Mar 22 18:18 public_keys/
root@foreman:/var/lib/puppet/ssl#
```

What is correct and the keys are fine is in the directories from install paths...

```
--foreman-server-ssl-ca=/etc/ssl/domain/certs/ca.pem \
--foreman-server-ssl-chain=/etc/ssl/domain/certs/ca.pem \
--foreman-server-ssl-cert=/etc/ssl/domain/certs/domain.pem \
--foreman-server-ssl-key=/etc/ssl/domain/private_keys/domain.pem
```

#18 - 03/23/2016 08:29 AM - Dominic Cleal

Yes, you need to specify the location of the CRL if you have one. You may be able to set it to UNDEF if you don't have one.

#19 - 03/23/2016 08:32 AM - Juan Carlos Perez

ups ... looks like I need this one ..

Certificate revocation lists

I was using this manual so .. https://jamielinux.com/docs/openssl-certificate-authority/certificate-revocation-lists.html

Looks like a need some minutes to test .. but I guess this is going to work like a charm!!!!

I will post as soon as I have an update!!!!! shortly and thanks .... thanks!

```
root@foreman:~# sudo foreman-installer \

    --no-enable-puppet \
    --no-enable-foreman-plugin-bootdisk \
    --no-enable-foreman-proxy \
    --foreman-db-adapter=mysql2 \
    --foreman-db-database=foreman \
    --foreman-db-host=db.domain \
    --foreman-db-manage=false \
    --foreman-db-username=foreman \
    --foreman-db-password='foreman_password' \
    --foreman-db-port=3306 \
    --foreman-db-type=mysql \
    --foreman-server-ssl-ca=/etc/ssl/domain/certs/ca.pem \
    --foreman-server-ssl-chain=/etc/ssl/domain/certs/ca.pem \
    --foreman-server-ssl-cert=/etc/ssl/domain/certs/domain.pem \
    --foreman-server-ssl-key=/etc/ssl/domain/private_keys/domain.pem \
    --foreman-server-ssl-crl=/etc/ssl/domain/certs/intermediate.crl.pem
```

```
Installing        Done                          [100%] [...................................]
Success!   * Foreman is running at https://foreman.domain
Initial credentials are admin / EDppd5uM9KCsaagY
The full log is at /var/log/foreman-installer/foreman-installer.log
```

- Status changed from New to Resolved

Looks good!

#22 - 03/23/2016 10:04 AM - Juan Carlos Perez

Well looks like now I am having some networking problems but most related to the topology and addressing of my company.
I am changing vagrant files with new ip addressing.. I will let you know …. But looks good….

Many thanks!

JC
