```
[DEBUG 2016-03-29 12:58:55 main] Exec[restart_foreman](provider=posix): Executing '/bin/touch /usr/share/foreman/tmp/restart.txt'
[DEBUG 2016-03-29 12:58:55 main] Executing '/bin/touch /usr/share/foreman/tmp/restart.txt'
[ WARN 2016-03-29 12:58:55 main] /Stage[main]/Foreman::Service/Exec[restart_foreman]: Triggered 'refresh' from 1 events
```

If I try to manually install ruby-foreman-setup:

```
sudo apt-get -q -y -o DPkg::Options::=--force-confold install ruby-foreman-setup
```

Reading package lists...

Building dependency tree...

Reading state information...

E: Unable to locate package ruby-foreman-setup

Here is my repository info:

```
grep ^ /etc/apt/sources.list /etc/apt/sources.list.d/* | grep foreman
/etc/apt/sources.list.d/foreman.list:deb http://deb.theforeman.org/ trusty stable
```

Indeed ruby-foreman-setup is not part of: <http://deb.theforeman.org/dists/trusty/stable/binary-amd64/Packages>

- *Status changed from New to Rejected*

You're missing the plugin repo, adding the main trusty/stable repo isn't enough. Add:

```
deb http://deb.theforeman.org/ plugins stable
```

See http://theforeman.org/manuals/latest/quickstart_guide.html for more details.

Alternatively, disable the installation of this default plugin by adding `--no-enable-foreman-plugin-setup` to the installer command.

(Incidentally, you can change the puppetserver value by using `--puppet-*` options.)
