Foreman - Bug #14411

External usergroup assignment doesn't work in Satellite 6.1

03/31/2016 02:37 AM - Daniel Lobato Garcia

Status: Resolved

Priority: High

Assignee: Daniel Lobato Garcia

Category: Users, Roles and Permissions

Target version:

Difficulty: Fixed in Releases:
Triaged: Found in Releases:

Bugzilla link: 1268253 Red Hat JIRA:

Pull request:

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1268253

Description of problem:

https://access.redhat.com/documentation/en-US/Red_Hat_Satellite/6.1/html/User_Guide/sect-Red_Hat_Satellite-User_Guide-User_Groups.html#sect-Red_Hat_Satellite-User_Guide-Configuring_External_User_Groups

Procedure 16.6. To Configure an External User Group:

Followed the steps to configure external usergroup mapping with a role in Satellite 6.1 doesn't work

Version-Release number of selected component (if applicable):

Satellite 6.1.2

How reproducible:

100%

Steps to Reproduce:

- 1. Create an external group in active directory and add some users to the group
- 2. Create a usergroup

Administer --> User Groups ---> Create a new group ---> In the role tab select any role ex. "Admin" --> In the external groups tab ---> specify the group name exactly similar to one in AD.

3. Login with external user which is a member of AD group linked. which fails with permission denied as it is not assigned to any groups (i.e. Anonymous)

Actual results:

Usergroup authentication doesn't honor the config specified

Expected results:

user group auth should work as expected. Also in most organizations AD Groups are created with white spaces, which should also work.

Ex: G USR - ROL eComm SSG Read-Only

Additional info:

A similar bug [1] has been filed for this issue which doesn't work with the steps or the patch mentioned in it.

- Category set to Users, Roles and Permissions
- Status changed from New to Need more information

05/19/2024 1/2

Please provide logs with LDAP debugging enabled (http://theforeman.org/manuals/1.10/index.html#7.2Debugging) and try on a current version.

#2 - 05/17/2017 03:47 PM - Anonymous

- Status changed from Need more information to Resolved

no reaction, closing. I can't access that BZ
