Description	
<p>I'm getting a very strange behavior on my latest foreman installation.</p> <p>The machine was installed with the latest development snapshot. I didnt install any hosts with it, yet. I just prepared it for installing solaris.</p> <p>Foreman is showing the host it is installed in the list of hosts, which is fine. But it's marked as "ready to build". But I didnt start any build on the maschine. (Why should I, I dont want to delete the foreman-host). So I tried to cancel that build process, and I get that message:</p> <pre>undefined method `join' for "Failed to cancel pending build for vm7603.test.local":String</pre> <p>After reviewing the logs of Rails I found that:</p> <pre>Started POST "/hosts/vm7603.test.local" for 10.110.10.95 at Tue Jan 17 07:52:20 +0000 2012 Processing by HostsController#update as HTML Parameters: {"commit"=>"Submit", "authenticity_token"=>"15Df/II3jV6YRuRB4jd96B19t46ZsvknND3n5htc go4=", "utf8"=>"", "id"=>"vm7603.test.local", "host"=>{"name"=>"vm7603.test.local", "puppetproxy_id"=>"1", "managed"= >"", "comment"=>""}, "puppetmaster_name"=>"vm7603.test.local", "hostgroup_id"=>"1", "enabled"=>"1", "environment_id"=>" 1", "model_id"=>"1", "puppetclass_ids"=>[""]} Failed to save: Domain can't be blank</pre> <p>So I set the domain, and get the next error:</p> <pre>Started GET "/hosts/vm7603.test.local/cancelBuild" for 10.110.10.95 at Tue Jan 17 07:53:02 +0000 2 012 Processing by HostsController#cancelBuild as HTML Parameters: {"id"=>"vm7603.test.local"} **DEPRECATION WARNING** Managing Puppet CA without a smart-proxy will not be supported in the nex t release **DEPRECATION WARNING** Managing TFTP without a smart-proxy will not be supported in the next rel ease Failed to save: Environment can't be blank Operation FAILED: undefined method `join' for "Failed to cancel pending build for vm7603.test.loca l":String</pre> <p>I also wonder about the deprecation-warning, because I have a smart-proxy running and it's also configured in the WebUI.</p> <p>What I expect:</p> <ol style="list-style-type: none">1) The foreman host shouldnt be shown as "ready to install"2) I shouldnt be able to add hosts or something if important steps are missing. This means: I can not create a host if I haven't create a domain, environment and so on.3) I should be able to cancel builds even if there are required information for provisioning is missing. Cancel should always be	

possible.

Suggestion:

Maybe an Setup-Wizard would be helpful, so that you have configured everything to install new hosts.

David M. wrote:

I'm getting a very strange behavior on my latest foreman installation.

The machine was installed with the latest development snapshot.
I didnt install any hosts with it, yet. I just prepared it for installing solaris.

Foreman is showing the host it is installed in the list of hosts, which is fine. But it's marked as "ready to build". But I didnt start any build on the maschine. (Why should I, I dont want to delete the foreman-host).
So I tried to cancel that build process, and I get that message:

[...]

After reviewing the logs of Rails I found that:

[...]

So I set the domain, and get the next error:

[...]

I also wonder about the deprecation-warning, because I have a smart-proxy running and it's also configured in the WebUI.

What I expect:

- 1) The foreman host shouldnt be shown as "ready to install"
- 2) I shouldnt be able to add hosts or something if important steps are missing. This means: I can not create a host if I haven't create a domain, environment and so on.
- 3) I should be able to cancel builds even if there are required information for provisioning is missing. Cancel should always be possible.

Suggestion:

Maybe an Setup-Wizard would be helpful, so that you have configured everything to install new hosts.

will take into account it too.
