Bugzilla link:		**Red Hat JIRA:**	
Pull request:	https://github.com/theforeman/foreman/pull/2525		

Description
The installation of solaris using foreman fails if "safemode_render" is true.

This message is shown when trying to open the template:

```
There was an error rendering the Jumpstart Default template: undefined method 'use_image' for Host
::Jail (Host)
```

Workaround: Set "safemode_render" to false in "More->Settings".

There is also an error when viewing the pxegrub-template. This time the workaround doesnt help:

```
There was an error rendering the Jumpstart default PXEGrub template: undefined local variable or method `multi
boot' for #<#<Class:0x7ffa030e0038>:0x7ffa02a55f60>
```

#2 - 03/27/2014 01:46 PM - Garrett D

I am experiencing this with foreman-1.4.2-1.el6.noarch on CentOS 6.5.

There was an error rendering the Jumpstart default PXEGrub template: undefined local variable or method `multiboot' for
#<#<Class:0x007f147cdbf258>:0x007f147cda92f0>

#3 - 07/07/2015 11:26 AM - Marek Hulán

- Description updated

- Category changed from Web Interface to Templates

- Assignee changed from Ohad Levy to Marek Hulán

This was caused by https://github.com/theforeman/community-templates/blob/develop/jumpstart/provision.erb#L8

For multiboot (and other) we need to allow several methods in host jail and change the template to load it from @host, since it's defined in HostTemplateHelpers concern, which is not included in controller.
