<b>Description</b>		
Attempting to install Katello 3.0RC, using the following repositories		
yum -y localinstall <a href="https://fedorapeople.org/groups/katello/releases/yum/3.0/katello/el7/x86_64/katello-repos-latest.rpm">https://fedorapeople.org/groups/katello/releases/yum/3.0/katello/el7/x86_64/katello-repos-latest.rpm</a>

and running foreman-installer --scenario katello		
fails, with the following in the katello.log

and re-running 'foreman-installer --scenario katello' the installation succeeds
