

Foreman - Bug #14543

PupeptCA Smart Proxy should "rm" certificate request files

04/08/2016 04:58 AM - Robert Heinzmann

Status: Duplicate	
Priority: Normal	
Assignee:	
Category: Smart Proxy	
Target version:	
Difficulty: easy	Fixed in Releases:
Triaged:	Found in Releases: 1.11.0
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
<p>Currently, if a "unsigned" puppet certificate request should be "deleted", the smart proxy calls:</p> <pre>Apr 8 10:44:48 puppet sudo: foreman-proxy : TTY=unknown ; PWD=/ ; USER=root ; COMMAND=/usr/bin/puppet cert --ssldir #{ssldir} --clean webserver-test1.XX.XX.XX.XX Apr 8 10:44:55 puppet sudo: foreman-proxy : TTY=unknown ; PWD=/ ; USER=root ; COMMAND=/usr/bin/puppet cert --ssldir #{ssldir} --list --all Apr 8 10:44:55 puppet sudo: foreman-proxy : TTY=unknown ; PWD=/ ; USER=root ; COMMAND=/usr/bin/puppet cert --ssldir #{ssldir} --list --all Apr 8 10:44:55 puppet sudo: foreman-proxy : TTY=unknown ; PWD=/ ; USER=root ; COMMAND=/usr/bin/puppet cert --ssldir #{ssldir} --list --all</pre> <p>However this does not clear the certificate request.</p> <p>The smart proxy should just "sudo rm -f SSLDIR/ca/requests/webserver-test1.XX.XX.XX.XX.pem"</p> <p>Note: This also needs a new "SUDO" Command in the foreman installer to allow this removal:</p> <pre>foreman-proxy ALL = (root) NOPASSWD : /bin/rm #{ssldir}/ca/requests/</pre>
