<b>Description</b>		
Since Foreman 1.10 it is not possible to restrict Resource="Lookup key" with search anymore. The page to edit says: "Selected resource type does not support granular filtering, therefore you can't configure granularity" In Foreman 1.9 this was working fine.

##### #3 - 04/08/2016 06:04 AM - Dominic Cleal

- Subject changed from No ability to restrict \*\_external\_variables with search anymore to No ability to restrict \*\_external\_variables with search anymore

- Category set to Users, Roles and Permissions

Looking in more detail, this might be more closely related to [#14535](#) than I thought. It's likely that having the permission point to LookupKey rather than PuppetclassLookupKey means the granularity? check is failing, as LookupKey itself has no search function.
