

Foreman - Bug #14562

Host index listing takes a long while

04/10/2016 07:54 AM - Ohad Levy

History

#1 - 04/10/2016 07:57 AM - Ohad Levy

for the record, API request on /api/v2/hosts takes 1362 ms. far too much by it self, but probably another ticket for another time.

#2 - 04/11/2016 01:50 AM - Marek Hulán

I think the reason was that we have to calculate fresh value of configuration status, otherwise OK -> out-of-sync transition would have to e triggered by some external process.

#3 - 04/11/2016 01:54 AM - Ohad Levy

out of sync is purely a time based calculation, afair host used to have a last reported column? so you would not need to pull that info from the reports table.

even if there are valid reasons, this bug imho is still valid, as it takes more than 50% of the time just to fetch the report info, it might as well be done async.

#4 - 04/11/2016 01:57 AM - Marek Hulán

- Category set to Performance

Yeah, I agree it's a valid bug, I just shared why I think it was accessing reports table. Definitely it must be investigated...

#### #5 - 04/18/2016 04:02 AM - Anonymous

I confirm this "bug".

I have about 200 hosts and /hosts query completes in ~3 mins.

```
2016-04-18T09:45:15 [app] [I] Started GET "/hosts" for x.x.x.x at 2016-04-18 09:45:15 +0200

which DB do you use? I've noticed a huge improvement when I changed from mysql 5.1 to mariadb10.

mysql 5.6.29-76.2

#### #8 - 11/11/2016 05:07 AM - M. Schwipps

Here it took for the first call more then 30 seconds and much kernel-IO-wait for about 500 hosts and 2.5m reports.  
We upgraded from postgres 9.3 to 9.6 and added the following index to the database

create index index\_reports\_on\_host\_id\_type\_id on reports (host\_id, type, id);

Now it's ok.

**#9 - 02/13/2017 10:48 AM - Timo Goebel**

- Related to Bug #18481: Host index listing takes a long while added

**#10 - 02/13/2017 10:49 AM - Timo Goebel**

```
create index index_reports_on_host_id_type_id on reports (host_id, type, id);
```

Now it's ok.

I can confirm, that the index helps a lot. Added [#18481](#) to add a db migration for this.

**#11 - 02/13/2017 11:06 AM - Anonymous**

I also added the index. Now it is much faster (~3 secs).
