Description

Images are going through the legacy asset helpers in sprockets-rails, we need to fix that.

For plugins we need to ensure that the digest is looking up digested assets in production and ensure that the prefix is set in order to generate the proper path for the assets.

This will allow the use of image-url in sass for the correct retrieval of digested images.

Revision db851032 - 04/15/2016 04:54 AM - Walden Raines

Fixes #14645: fix production images for plugins.

Images were going through the legacy asset helpers in sprockets-rails, this commit sets some options on the context class to ensure we are looking up digested images in the correct path.
