Pull request:	
Description When creating new Operating Systems, the name-generation should include the architecture (x86_64/i386/sparc/whatever). Otherwise you see multiple entries of the same system-name on the OS-Overview page and in Host-Overview. The width of the OS-Column in Host-overview should also be larger, so that this extra information is visible.	

History

- Description updated
- Status changed from New to Need more information
- Assignee deleted (Ohad Levy)

I re-read it now, and I can't say I fully understand the problem, a screenshot or similar would probably help.

thanks

no reaction, closing. I also think personally this would make no sense.
