

Foreman - Bug #14691

Invalid user name string shown in the main menu on edit form

04/18/2016 01:24 PM - Brad Buckingham

Status:	Closed	
Priority:	Normal	
Assignee:	Shlomi Zadok	
Category:	Web Interface	
Target version:	1.11.2	
Difficulty:		Fixed in Releases:
Triaged:		Found in Releases:
Bugzilla link:	1327670	Red Hat JIRA:
Pull request:	https://github.com/theforeman/foreman/pull/3436 , https://github.com/theforeman/foreman/pull/3441	

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1327670

Description of problem:

While updating own name/surname, the new string gets displayed in the main menu even when it's invalid (e.g. too long) (see screenshot).

This is not permanent as the form can't be successfully submitted and disappears as soon as user get the name right or cancels the form.

Version-Release number of selected component (if applicable):

6.2.0 snap 8.1

How reproducible:

always

Steps to Reproduce:

1. navigate to My Profile > Edit User
2. update first name/surname to some invalid string
3. hit submit

Actual results:

the name updates in the main menu even if it's not valid

Expected results:

no change is done until form successfully submits the valid data

Fixes #14691 - User #to_label should show persisted name

Revision bd622a22 - 04/20/2016 08:27 AM - Dominic Cleal

refs #14691 - user editing self should not change User.current

Rather than changing the behaviour of #to_label to return persisted data, the User.current object should not be modified with unsaved data from the form submission or API update.

User.current is used for authz as well as for display purposes, so shouldn't be changed. Parameter filtering protects privilege escalation in this case.
