Description From time to time the 'Hosts with No Reports' field on my dashboard will report that a negative number of hosts has no reports. When you click the link to get a listing of those hosts there are none ... usually it will get back to 0 hosts. Right now its been sitting at around '-100' (its been fluctuating) for about an hour though. Let me know if any additional information can be gathered to help identify the issue.

fixes #1470 hosts with no report should not be negative

History

#1 - 04/27/2012 02:49 PM - Jason Barnett

I have this exact problem. It used to go away, but lately it's been stuck with a negative number.

#2 - 06/13/2012 05:10 AM - Mattias Winther

It seems that this is due to the host filter "not has last_report". At a glance, it doesn't work correctly with facts.<factname> either. Maybe something wrong with the general logic for "not has", then?
