

Foreman - Bug #14720

User not shown error message when invalid email address copied from external auth source

04/19/2016 03:28 PM - Bryan Kearney

Status: Closed	
Priority: Normal	
Assignee: Ashish Humbe	
Category: Authentication	
Target version: 1.13.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link: 1317745	Red Hat JIRA:
Pull request: https://github.com/foreman/foreman/pull/3598	
Description	
If the email address is not updated correctly in the LDAP server then while logging in to satellite webui with same username fails to create user.	
The error message from log:	
2016-03-11 04:18:15 [!] Failed to save User 'sat6-user2' ["Email address is invalid"]	
2016-03-11 04:18:15 [!] invalid user	
2016-03-11 04:18:15 [!] Redirected to https://satellite.example.com/users/login	
2016-03-11 04:18:15 [!] Completed 302 Found in 945ms (ActiveRecord: 2.7ms)	
The customer's expectation is to have a page in which there is written the wrong parameter, asking to override it. Or, at least, having a message in WEB GUI like "XXX (here email) parameter are not correct please correct it".
