

Foreman - Bug #14742

Template kind friendly names from plugins can be reloaded and lost in development

04/21/2016 04:31 AM - Dominic Cleal

Status: Closed	
Priority: Normal	
Assignee: Dominic Cleal	
Category: Templates	
Target version: 1.12.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/foreman/foreman/pull/3444	
Description	
Template kind friendly names added through the plugin template labels interface can be lost when TemplateKind is reloaded, as it's stored in a class variable.	
<ol style="list-style-type: none">1. Call <code>template_labels</code> from a plugin registration (e.g. <code>foreman_bootdisk</code> master branch)2. View the templates list, check it's showing the friendly name3. Edit <code>TemplateKind</code>, to reload the class4. Refresh the template list, the friendly name will disappear

fixes #14742 - retrieve template kind labels from plugin regs

Ensures plugin kinds registered in class variables aren't lost when the `TemplateKind` class is reloaded.
