

Smart Proxy - Bug #14775

virsh/libvirt migration doesn't update DNS/DHCP module provider from *_virsh

04/22/2016 08:10 AM - Dominic Cleal

Status: Closed	
Priority: Normal

Category: DNS	
Target version: 1.12.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases: Nightly
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/foreman/smart-proxy/pull/412	
Description	
<p>The migrate_virsh_to_libvirt_config migration doesn't update the :use_provider setting in the main DNS/DHCP module configuration files to the new provider names.</p> <p>e.g. dhcp.yml:</p> <pre>--- :enabled: true :use_provider: dhcp_virsh :server: 127.0.0.1</pre> <p>This was unchanged when running the config file migrations. This results in errors on startup after an update:</p> <pre>E, [2016-04-22T13:08:28.996380 #992] ERROR -- : Couldn't enable plugin dns: Unable to find dependency 'dns_virsh' of 'dns'.
