Bugzilla link:	1328935	**Red Hat JIRA:**	
Pull request:	https://github.com/theforeman/foreman/pull/3455		

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1328935
Description of problem:
Operating system description length accepts more than 255 characters

Version-Release number of selected component (if applicable):
satellite-6.2.0-8.2.beta.el7sat.noarch

How reproducible:
Always

Steps to Reproduce:
1.Create an operating system with description of length 256 characters
2.
3.

Actual results:
Operating system created with no errors

Expected results:
Until last build, we allowed os description length upto a maximum of 255 characters only, now its broken.

Associated revisions

Revision 86500467 - 06/13/2016 04:39 AM - Daniel Lobato Garcia

Fixes #14783 - Limit OS description to 255

This field forms part of 'os.title' too.

- Status changed from New to Rejected

This isn't a bug, it's by design: #9357.

#3 - 04/22/2016 10:50 AM - David Davis

I would argue that this probably should be a bug. The description is used as an identifier in the UI and the field is even a textfield and not a text area. I think we should either change description back to a varchar in the database or reinstate a limit to OS description. Unlimited is too long for operatingsystems index, architecture edit, etc.
