<b>Pull request:</b> <a href="https://github.com/foreman/foreman/pull/3484">https://github.com/foreman/foreman/pull/3484</a>	
<b>Description</b>	
Katello is using `alias_method_chain` in order to tap into #create and #destroy methods.	
This leads to code duplication between foreman and katello, especially around results redirection.	
For more information see issue <a href="http://projects.theforeman.org/issues/14369">http://projects.theforeman.org/issues/14369</a> . The fix will not be effective, if katello is enabled.
