Pull request:	https://github.com/theforeman/foreman/pull/3467		

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1178200
Description of problem:
If you go to Hosts > Provisioning Templates > [select a template] > Associations, there's a string on the screen without any ending punctuation. "When editing a Template, you must assign a list of Operating Systems which this Template can be used with. Optionally, you can restrict a template to a list of Hostgroups and/or Environments"

There should be a period at the end of that second sentence.

Version-Release number of selected component (if applicable):
6.0.6
