Pull request:	
Description	
With Foreman 0.4.2 and latest chrome (dev branch, 18.0.1025.7) on MacOS X Lion I can't see any numbers on the dashboard. See attached screenshot.

Do you see any JS errors in your browser?

#2 - 02/09/2012 07:15 AM - Jonas Bygdén

Two

"Error: Invalid negative value for <rect> attribute height="-1""

And

"event.layerX and event.layerY are broken and deprecated in WebKit. They will be removed from the engine in the near future."

#3 - 02/13/2012 01:52 PM - Ohad Levy

- Status changed from New to Pending

since I cant reproduce with chrome v17, and v18 is not an official release, i think for the time being we'll leave it open, and hopefully it would be fixed when v18 is officially released.

thanks
