Pull request:			

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1284832
Description of problem:
After upgrading satellite to version 6.1.4 the 'Usergroup Sync' under Ldap Authentication get enabled automatically.

Version-Release number of selected component (if applicable):
Red Hat Satellite 6.1.4

How reproducible:
Always

Steps to Reproduce:
1. On Satellite 6.1.3 or below version. Satellite webui --> Administer --> Ldap Authentication --> Click on name --> Account --> here uncheck the 'Usergroup Sync' is present --> Save
2. Upgrade satellite to 6.1.4 by performing steps from installation guide.
https://access.redhat.com/documentation/en-US/Red_Hat_Satellite/6.1/html-single/Installation_Guide/index.html#sect-Red_Hat_Satellite-Installation_Guide-Upgrading_Red_Hat_Satellite_Server_and_Capsule_Server-Upgrading_Red_Hat_Satellite

3. Satellite webui --> Administer --> Ldap Authentication --> Click on name --> Account --> here the 'Usergroup Sync' is checked

Actual results:
'Usergroup Sync' is enabled automatically resulting in login failure.

Expected results:
Upgrade should not automatically enable 'Usergroup Sync' and should maintain configuration.

History

#1 - 04/28/2016 09:48 AM - Dominic Cleal

- Status changed from New to Need more information

Not a very useful bug report with regards to Foreman, there's no context... which upstream versions does this upgrade correspond to? 1.10 to 1.11?

#2 - 07/12/2016 08:10 AM - Bryan Kearney

- Bugzilla link changed from 1284832 to 1315268

#3 - 07/27/2016 04:41 AM - Ivan Necas

- Category set to Authentication

#4 - 12/14/2016 11:09 AM - Daniel Lobato Garcia

- Status changed from Need more information to Resolved

Closing as this was about that flag being enabled when migrating to 1.11 when it was introduced and not about us changing that property from what false to true on a migration.
