

Foreman - Bug #14960

alias_method_chain in settings helper breaks plugins

05/09/2016 03:45 AM - Ori Rabin

Status: Closed	
Priority: Normal	
Assignee: Tomer Brisker	
Category: Settings	
Target version: 1.12.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/foreman/foreman/pull/3503	
Description	
Adding select boxes to Settings changed the value method in settings_helper: https://github.com/foreman/foreman/commit/ad603e4023c5400c51674f1fa3635565f7b3b552#diff-99f01fed5094bece4bbc97c882f4b666R4 . Discovery extends the settings_helper and adds it's own alias_method_change for value. As a result trying to use discovery returns the error: `alias_method': undefined method `value' for module `#<Module:0x00000006f36320>' (NameError)
