Description	
<p>I believe this is a regression and it was set to INFO previously. Currently I see this set to ERROR which is not good. There is nothing that can tell you that requests are actually coming to proxy. Since we rotate our logs and traffic is not huge, I see no reason not to set it to INFO. Our logging is clean:</p>

Fixes #14995 - proxy default log is INFO

History

#1 - 05/11/2016 03:44 AM - Dominic Cleal

- Project changed from *Installer* to *Smart Proxy*
- Category changed from *Foreman modules* to *Core*

The installer follows the smart proxy default, which is (and has been for as long as I'm aware) set to ERROR - per settings.yml.example and lib/proxy/settings/global.rb.

#2 - 05/11/2016 03:49 AM - Lukas Zapletal

- Tracker changed from *Bug* to *Refactor*

Changing this to proposal, I see no reason why to avoid INFO.

- Status changed from *New* to *Ready For Testing*
