Pull request:	https://github.com/theforeman/smart-proxy/pull/418		

Description
In puppet 4 (puppet-agent AIO packages) the location of the mco binary has changed.
The mcollective puppetrun provider tries to find the mco binary here. https://github.com/theforeman/smart-proxy/blob/f9c9e7ad4183d26e4060ed85bf38d580b5c356bd/modules/puppet_proxy/mcollective.rb#L18 and fails.

Revision 67f82027 - 05/13/2016 10:23 AM - Alex Fisher

fixes #15043 - Fix puppet 4 mco search path

In puppet 4, (AIO packaging), binaries can be found in
`/opt/puppetlabs/bin`.

(`/opt/puppetlabs/bin/mco` is actually a symlink to
`/opt/puppetlabs/puppet/bin/mco`, but `/opt/puppetlabs/bin` is what's
added to PATH in `/etc/profile.d/puppet-agent.sh` so is probably the
path that should be searched.)
