<b>Description</b>	
<p>Trying to integrate foreman with puppet, using webrick, i hit an issue very similar to this one: <a href="http://theforeman.org/issues/229">http://theforeman.org/issues/229</a> But even adding a default node in puppet's configuration i got the same problem, eg:</p> <pre>root@leith:/etc/puppet# puppet agent --test --server leith.fre.local --noop notice: Ignoring --listen on onetime run err: Could not retrieve catalog from remote server: Error 400 on SERVER: Could not find node 'leith.fre.local'; cannot compile warning: Not using cache on failed catalog err: Could not retrieve catalog; skipping run</pre> <p>turns out, the node.rb generated from the installer foreman's puppet class (using ubuntu's packages but same stuff with RH repos, epel and foremans), has this setting:</p> <pre>[...] SETTINGS = { :url    =&gt; "http://leith.fre.local:3000*/**", [...]</pre> <p>Which actually is right, but when the ECN script connects to foreman to ask for node's yaml, the actual HTTP get request is:</p> <pre>GET http://leith.fre.local:3000//node/leith.fre.local?format=yml HTTP/1.1 Accept: */* Host: leith.fre.local:3000</pre> <p>which results in webrick replying with 404 - node not found.</p> <p>Just taking out the last '/' in the ecn script:</p> <pre>[...] SETTINGS = { :url    =&gt; "http://leith.fre.local:3000", [...]</pre> <p>solves the issue.</p> <p>IMHO, this seems like a webrick issue, though not sure if double / are allowed by the HTTP specifications. Posted this to save time to other poor souls who may hit the same issue, so please add this on the documentation.</p> <p>Thanks, Frederik</p>
