| Description | |
| <p>The older version of Bundler (1.3.5) used on Ubuntu 14.04 is failing to find a compatible version of fog-google due to the two slightly different requirements in bundler.d/gce.rb and fog's gemspec:</p> <pre>08:38:16 /usr/bin/ruby2.0 /usr/bin/bundle pack --all 08:38:18 Fetching gem metadata from https://rubygems.org/..... 08:38:31 Fetching gem metadata from https://rubygems.org/.. 08:38:32 Resolving dependencies..... 08:38:33 Bundler could not find compatible versions for gem "fog-google": 08:38:33 In Gemfile: 08:38:33 fog (= 1.38.0) ruby depends on 08:38:33 fog-google (<= 0.1.0) ruby 08:38:33 fog-google (0.3.2)</pre> | |
| <p>The bundler.d/gce.rb specification should just mirror fog's for now for consistency. When fog changes it and we update fog, bundler.d/gce.rb can be updated in sync.</p> | |
