Revision ad2ee956 - 05/30/2016 10:01 AM - Ohad Levy

fixes #15223 - query parameters are now correct.

before this patch, there were two query parameters (/hosts/template_used?id=47?provisioning=build). since the view always prepand the hosts ID parameter, it is safe to assume the URL always contain a leading parameter (e.g. /hosts/template_used?id=47).
