Foreman - Bug #15238

Multiple interfaces with empty identifier are marked as invalid

05/31/2016 07:59 AM - Marek Hulán

Status:	Closed		
Priority:	Normal		
Assignee:	Marek Hulán		
Category:	Network		
Target version:	1.11.3		
Difficulty:		**Fixed in Releases:**	
Triaged:		**Found in Releases:**	
Bugzilla link:	1406362	**Red Hat JIRA:**	
Pull request:	https://github.com/theforeman/foreman/pull/3560		

Description

The NIC validation is not treating empty identifier correctly. While the validation method on host skips such interfaces, validation on NIC side tries to enforce uniqueness even of empty identifiers. This causes problems during provisioning of host with multiple interfaces, preventing the TFTP change because of interface being invalid. To reproduce, create a host with two interfaces with empty identifier. Then try editing the host, e.g. changing the comment attribute. It fails on interface identifier being already taken.
