

Foreman - Bug #15247

toplevel constant PuppetError referenced by MailNotification::PuppetError

05/31/2016 11:36 AM - Dominic Cleal

Status: Closed	
Priority: Low	
Assignee: Dominic Cleal	
Category: E-Mail	
Target version: 1.12.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/foreman/foreman/pull/3562	
Description	
When running <code>test/unit/report_importer_test.rb</code> , some warnings are logged (on Ruby 2.3.0 at least): <pre>/home/dcleal/code/foreman/foreman/app/services/report_importer.rb:102: warning: topLevel constant PuppetError referenced by MailNotification::PuppetError</pre>	
The class mentioned should simply be <code>PuppetError</code> - it extends <code>MailNotification</code> , but is not namespaced under it.
