Target version: 1.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description After a fresh install" <pre>\$ cat /etc/foreman-proxy/settings.yml ... # Where our proxy log files are stored # filename or STDOUT :log_file: /tmp/proxy.log ...</pre> /tmp is no appropriate location for any logfile. The rpm should provide a better default.	
Related issues: Is duplicate of Smart Proxy - Bug #1548: Default Settings File Improvments Closed 03/23/2012
