Description

We use Foreman 1.11.2 and foreman_dhcp_browser 0.0.7 and get an error message when opening the dhcp browser:

```
undefined method `sort' for nil:NilClass
```

You`ll find the proxy.log attached.

Best regards,
Dennis

Which URL exactly are you viewing when you get the error?

I think you might be accessing the smart proxy on port 8443 with your browser causing the bug, not using the foreman_dhcp_browser plugin (which IIRC adds links under Infrastructure > Smart Proxies in the UI).

The web browser support for the smart proxy has been removed in 1.12 as it was buggy and unsupported.

#2 - 06/09/2016 03:51 AM - Dennis Benndorf

Yes I was accessing through http://puppetserver:8443/dhcp.
I didnt notice that this feature was moved into smart proxy tabs.

Thanks for pointing me this. This can be closed now.

Regards,
Dennis
