Foreman - Bug #15358

UserData default is insecure

06/08/2016 11:01 PM - Chris Edester

Status:	Closed		
Priority:	Normal		
Assignee:	Chris Edester		
Category:	Templates		
Target version:	1.13.0		
Difficulty:	trivial	**Fixed in Releases:**	
Triaged:		**Found in Releases:**	
Bugzilla link:		**Red Hat JIRA:**	
Pull request:	https://github.com/theforeman/community-templates/pull/281		

Description

The Cloud init template creates an admin account with a password, which is against standard best practices in cloud providers.
Read the section under passwd: http://cloudinit.readthedocs.io/en/latest/topics/examples.html#including-users-and-groups
Remember user data can be seen by anyone, for example EC2 stores this with the instance for later editing/reference.
