<b>Description</b>	
Foreman should always check if a DHCP-Entry for a host is still present if the host gets rebuild.	
In my case Foreman did not add the DHCP-Entry for an old host which I wanted to rebuild. The original DHCP-Entry added initially from Foreman was removed by deleting dhcpd.leases file.	
What I expect:	
Foreman should check if the host which is getting build has an entry in the DHCP with the entered settings (IP, MAC and so on). If it doesnt, it should be added.
