<b>Description</b>	
<p>When i try to delete a discovered host and get the following error message:</p> <pre>"Oops, we're sorry but something went wrong undefined method `progress_report_id' for #&lt;Host::Discovered:0x00000004333c78&gt;"</pre> <p>NoMethodError undefined method `progress_report_id' for #&lt;Host::Discovered:0x007fc192b32bc0&gt; /opt/rh/rh-ror41/root/usr/share/gems/gems/activemodel-4.1.5/lib/active_model/attribute_methods.rb:435:in `method_missing' /opt/rh/rh-ror41/root/usr/share/gems/gems/activerecord-4.1.5/lib/active_record/attribute_methods.rb:208:in `method_missing' /usr/share/foreman/app/models/nic/managed.rb:16:in `progress_report_id' /usr/share/foreman/app/models/concerns/orchestration.rb:190:in `update_cache' /usr/share/foreman/app/models/concerns/orchestration.rb:105:in `block in process' /usr/share/foreman/app/models/concerns/orchestration.rb:99:in `each' ...</p> <p>When I rovision the host I only get one Interface from two and the ipmi Interface also vanished, after adding them manually I can deploy. But more confusing is that the host is still in the list of discovered host and I'm not able to delete it.</p> <p>Installed Plugins: foreman_plugin_default_hostgroup foreman_plugin_dhcp_browser foreman_plugin_discovery foreman_plugin_hooks foreman_plugin_setup foreman_plugin_templates (no puppet, only as SmartProxy)</p>

Hi,

tested the changes from Pull request <https://github.com/foreman/foreman/pull/3672> . It's now working for me i can delete the discovered hosts. I tested it on both versions i wrote on the previous post.

Big thanks to all...
