Description	
<p>I happen to run into this bug after copying my database from a 0.4 instance which doesn't have libvirt setup to the latest develop branch. I am not sure why an update to a host object requires the use of a hypervisor.</p> <p>I also noticed that I can't edit a hostgroup that is a parent of another hostgroup.</p> <pre>Started PUT "/hosts/dnsserver.logicminds.corp?format=json" for 192.168.1.15 at Sun Mar 18 22:11:44 -0700 2012 Processing by HostsController#update as JSON Parameters: {"name"=>"dnsserver.logicminds.corp", "hostgroup_id"=>3, "id"=>"dnsserver.logicminds.corp", "environment_id"=>1, "host"=>{"puppetclass_ids"=>[36, 33, 34]}} Failed to connect to hypervisor esx - Must provide a username and password Failed to initialize the Libvirt connection: Must provide a username and password Failed to save: Failed to initialize the Libvirt connection: Must provide a username and password Completed 422 Unprocessable Entity in 290ms (Views: 0.5ms ActiveRecord: 10.2ms)</pre>	

History

#1 - 03/18/2012 06:36 PM - Corey Osman

I removed the hypervisor but it looks like the host is still attached to it somehow.

```
Started PUT "/hosts/dnsserver.logicminds.corp?format=json" for 192.168.1.15 at Sun Mar 18 22:34:56 -0700 2012
Processing by HostsController#update as JSON
Parameters: {"name"=>"dnsserver.logicminds.corp", "hostgroup_id"=>3, "id"=>"dnsserver.logicminds.corp", "environment_id"=>1, "host"=>{"puppetclass_ids"=>[36, 44]}}
Failed to initialize the Libvirt connection: Couldn't find Hypervisor with ID=1
Failed to save: Failed to initialize the Libvirt connection: Couldn't find Hypervisor with ID=1
Completed 422 Unprocessable Entity in 94ms (Views: 0.6ms | ActiveRecord: 8.4ms)
```

#2 - 03/19/2012 02:59 AM - Ohad Levy

- Status changed from New to Feedback
- Assignee changed from Ohad Levy to Corey Osman
- Target version deleted (1.0)

Corey, this error message seems related to your esx branch, normally we don't validate u/p within this context.

can you show me the entire diff?

Thanks
