Make foreman integration optional

Instead of including foreman::params, the values are copied. That means foreman::params no longer needs to be included.

The next use of foreman is in puppet::server::config where it sets up reporting and ENC. This is wrapped in a new boolean \$server\_foreman. The user will still need to take care of clearing \$server\_reports and \$server\_external\_nodes.

as the acts\_as\_audited plugin latest version broke a few things, I had to revert it back.

the bug itself is actually within the plugin, I'll try to see if I can find a way around it.
