<b>Pull request:</b>	
<b>Description</b>	
reprocude:	
<ol style="list-style-type: none"><li>1. create a param in a hostgroup</li><li>2. created a new nested hostgroup under it</li><li>3. add a host to new nested hg</li><li>4. search hosts with the param set on the parent hostgroup.</li></ol>	
expected result: see the host in search results	
actual result: no hosts are shown in search results.	

#### History

- Description updated

- Status changed from New to Resolved

Tested today with 1.10, seems to no longer be an issue - scoped search even suggested the parameter name and value. Closing, re-open if I've misunderstood ;)
