

## Foreman - Bug #1543

### Imported host, could not edit host as domain was not set.

03/19/2012 03:41 PM - Brian Green

| <b>Description</b>  |                           |
| <p>New installation of Foreman 0.5 on CentOS 6. After importing facts and hosts, I was not able to edit the host and save any of the changes (environment, classes etc). No popup warning. When browsing through Foreman log I found warning of 'Failed to save: Domain can't be blank'. I am running with unattended mode disabled, with Puppet master on the same node, both Puppet &amp; Foreman being served via Passenger.</p> <p>After entering a domain, I was able to save settings/classes for the host.</p> |                           |

#### History

##### #1 - 08/07/2012 02:57 PM - Ohad Levy

- Status changed from New to Closed

- Target version set to 1.1

this was actually fixed already in [c832a24f](#)

##### #2 - 08/09/2012 09:52 AM - Ohad Levy

- Target version changed from 1.1 to 1.0.1
