

## Katello - Bug #15470

### Upgrade from 2.4 to 3.0 lost my foreman-ipa-authentication setting

06/20/2016 12:21 PM - Leah Fisher

<b>Status:</b> Rejected

<b>Pull request:</b>	
<b>Description</b>	
After upgrading to Katello 3.0/Foreman 1.11 I was unable to log in using my ipa credentials. After searching, I found that the --foreman-ipa-authentication was set to false. Running the installer with this set to true solved my issues.

- Status changed from New to Need more information

Leah,

When you did your upgrade, did you have rubygem-kafo-0.7.4 installed?

##### #2 - 07/13/2016 02:00 PM - Leah Fisher

When I ran yum update, it wasn't in the packages, but I installed it manually before I ran the foreman-installer --upgrade command.

##### #3 - 08/03/2016 01:26 PM - Justin Sherrill

- Category set to Installer

- translation missing: en.field\_release set to 171

- Difficulty set to medium

##### #4 - 06/07/2017 05:51 AM - Justin Sherrill

- translation missing: en.field\_release set to 166

##### #6 - 06/14/2017 02:09 PM - Justin Sherrill

- Status changed from Need more information to Rejected

The upgrade process has improved greatly since 3.0 and we do not believe this is an issue any more. Please reopen if someone hits this again. Thanks!
