Description

I have rebuilt foreman 1.12 from scratch, i was previously using foreman 1.11.
I can't add my CentOS 6 nodes back in foreman : they're added to foreman host list but no os is affected, interfaces ares not populated, even default organization is not affected.
I also have a lot of CentOS 7 nodes, even CentOS 5, and no problem for these nodes, they all came back to foreman as expected.

I join the foreman production log when running puppet agent from a CentOS 6 node.

History

#1 - 06/22/2016 10:38 AM - Dominic Cleal

- Subject changed from Can't add CentOS 6 back to foreman 1.12 to "Title has already been taken" importing CentOS 6 OS from facts

- Category set to Importers

The error suggests it can't create a new CentOS 6 operating system (under Hosts > Operating systems) as there's one with an identical description to what it's trying to create, but probably different major/minor versions. It might be worth double checking which OSes you have and tidying them up if the descriptions aren't correct.

#2 - 06/22/2016 10:56 AM - Alexandre Barth

OMG so sorry, you're right, i forgot to update my minor version from 7 to 8 for CentOS 6 in my script which generates my foreman server ...
TY Dominic :)

#3 - 06/22/2016 01:30 PM - Anonymous

- Status changed from New to Rejected
