

Katello - Bug #15647

Hammer hostgroup create insist on lifecycle environment

07/11/2016 11:14 AM - Andrew Kofink

| Status: Rejected | |
| Priority: Normal | |
| Assignee: Andrew Kofink | |
| Category: Hammer | |
| Target version: Katello Recycle Bin | |
| Difficulty: | Fixed in Releases: |
| Triaged: | Found in Releases: |
| Bugzilla link: 1354462 | Red Hat JIRA: |
| Pull request: | |
| Description | |
| Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1354462 | |
| REGRESSION (was working in pre-15 drops) | |
| BLOCKER (unable to create hostgroup via CLI -> no provisioning) | |
| Some recent change broke hammer cli command: | |
| <pre>[root@hp-bl465cg7-01 ~]# hh hostgroup create --name "CentOS 7.0" --architecture x86_64 --domain nested.lan --subnet nested.lan --operatingsystem "CentOS 7.0" --medium mirror_centos --partition-table "Kickstart simple" --puppet-proxy-id 1 --puppet-ca-proxy-id 1 --environment production --root-pass "\$PASS\$PASS\$PASS" --organizations "\$ORG" --locations "\$LOC" Could not create the hostgroup: Error: lifecycle_environment not found</pre> | |
| This was previously working. Now, the problem is it does not respect lifecycle-environment option which was added: | |
| <pre>[root@hp-bl465cg7-01 ~]# hh hostgroup create --name "CentOS 7.0" --architecture x86_64 --domain nested.lan --subnet nested.lan --operatingsystem "CentOS 7.0" --medium mirror_centos --partition-table "Kickstart simple" --puppet-proxy-id 1 --puppet-ca-proxy-id 1 --environment production --root-pass "\$PASS\$PASS\$PASS" --organizations "\$ORG" --locations "\$LOC" --lifecycle-environment "TestEnv" Could not create the hostgroup: Error: lifecycle_environment not found</pre> | |
| You can't provide even numeric ID - all is ignored. Debug mode reveals that due to typo in the codebase perhaps, the CLI tries to search Katello environments via --environment (puppet) option: | |
| <pre>[INFO 2016-07-11 07:34:01 API] GET /katello/api/organizations/1/environments [DEBUG 2016-07-11 07:34:01 API] Params: { "name" => "production" } [DEBUG 2016-07-11 07:34:01 API] Headers: { :params => { "name" => "production" } } [DEBUG 2016-07-11 07:34:01 API] Response: { "total" => 0, "subtotal" => 0, "page" => 1, "per_page" => 20, "error" => nil, "search" => nil, "sort" => { "by" => nil, "order" => nil }, "results" => []</pre> | |

}

The query is "production" while I expect it to be "TestEnv".

This bug is unfortunate as it blocks automated CLI installation and setup of provisioning. Hostgroup is a must in provisioning setups (for activation key).
