

Foreman - Bug #1566

Puppet CA set incorrectly when only one proxy is defined

04/04/2012 08:38 AM - Greg Sutcliffe

Status: Closed	
Priority: Normal	
Assignee: Greg Sutcliffe	
Category: Host creation	
Target version: 1.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
This is related to the way a combo-box defaults to "blank" even when there is only one valid option. Because we hide the rendering of the combobox when there is only one puppet proxy, it can't be set to the right value.	
Need to investigate why the proxy isn't being set to the only valid option when there's only one proxy.

fixes #1566 - Puppet CA set incorrectly when only one proxy is defined

History

#1 - 05/01/2012 12:31 PM - Greg Sutcliffe

You can work around this with this patch:

```
diff --git a/app/helpers/hosts_and_hostgroups_helper.rb b/app/helpers/hosts_and_hostgroups_
index d03c609..885a2e7 100644
--- a/app/helpers/hosts_and_hostgroups_helper.rb
+++ b/app/helpers/hosts_and_hostgroups_helper.rb
@@ -63,7 +63,7 @@ module HostsAndHostgroupsHelper
   ca      = SmartProxy.joins(:features).where(:features => { :name => "Puppet CA" })
   proxies = SmartProxy.joins(:features).where(:features => { :name => "Puppet" })
   # do not show the ca proxy, if we have only one of those and its the same as the puppe
-  fields = puppet_ca(f) unless ca.count == 1 and ca.map(&:id) == proxies.map(&:id)
+  fields = puppet_ca(f) unless ca.count == 0 and ca.map(&:id) == proxies.map(&:id)
   "#{fields} #{puppet_master(f)}.html_safe
end
```

Although you'll have to edit your hosts again :(
