Description	
In Katello 2.4, I'm getting errors trying to promote a content view. The task reports: "Validation failed: Puppet environment can't be blank". Any idea what might be causing this or how to fix it?	
Thanks.	
Brian	

History

I am also seeing:

```
Validation failed: Puppet environment can't be blank
undefined method `locations=' for nil:NilClass
```

And it won't let me cancel the task.

- Status changed from New to Need more information

- translation missing: en.field_release set to 166

Can you try running through this gist:

<https://gist.github.com/jlsherrill/2dd11592853885643251>

If that doesn't help, uploading the full traceback may be helpful too.
